JD Title: **LEAD BACKEND DEVELOPER**
JD Reference: IFT_JDEN_1019_LEBADEV01

Company: **Inflyter S.A.S.**
Date: 13/10/19

Full Time / Permanent

You are passionate about software development (degree holder or self-taught) and have significant experience in developing solid backend services and APIs. You also understand mobile platform constraints and data security, and pay as much attention to the quality of the code as to the user experience.

Job description :

Reporting to the CTO, you will be the lead to:

- Provide support, maintenance and improve the existing REST API (new features, code refactoring, unit tests, debugging)
- Ensure the link between the back-end and the front-end (both B2C/B2B iOS and Android apps)
- Integrate new APIs such as new payment methods
- Develop and maintain the new REST API for our locker system
- Improve and add new features to the existing back office
- Participate in the drafting of project's technical documentation
- Monitor technology trends and experiment with new technologies

Required skills :

- Excellent understanding of PHP, Symfony framework, Twig and SQL
- Good skills in HTML and CSS
- Excellent understanding of object-oriented programming and REST APIs
- Be familiar with versioning tools: Git / Github
- Strong ability to work in an agile environment (Scrum)

Required profile :

- Understand best practice and constraints in relation to mobile environments
- Production of good quality code and have a capability for code refactoring, and code abstraction

Personal skills :

- Good oral and written communication
- Strong ability to adapt to a startup environment
- Independent and collaborative individual capable of working independently or as part of a team

Extra skills desired but not essential :

- Experience with Amazon Web Services such as Amazon S3 and Elastic Beanstalk
- Experience with Docker and containerisation aspects
- Understanding of Microservices & SOA architectures

Workplace:

- Central London (EC3A), United Kingdom
- International travel may be required
