JD Title: **SWIFT-iOS DEVELOPPER**  
JD Reference: IFT\_JDEN\_1019\_SWIODEV01

Company: **Inflyter S.A.S.**  
Date: 10/10/19

Full Time / Permanent

You are passionate about software development (degree holder or self-taught) and have significant experience in developing mobile applications. You also understand mobile platform constraints and data security, and pay as much attention to the quality of the code as to the user experience.

### **Job description :**

Reporting to the CTO, you will be the lead to:

- Design and development of new features for our B2B and B2C applications
- Provide support, maintenance and improve the existing applications (code refactoring, unit tests, debugging)
- Ensure the link between the back-end and the front-end (integration of the REST API)
- Participate in the drafting of project's technical documentation
- Integrate graphic models
- Monitor technology trends and experiment with new technologies

### **Required skills :**

- Excellent understanding of Swift 3.x, 4.x and 5.x as well as iOS SDK
- Excellent understanding of object-oriented programming
- Excellent understanding of Xcode and knowledge of technologies AutoLayout, CoreLocation, CoreData, CoreGraphics, CoreAnimation
- Be familiar with versioning tools: Git / Github as well as using pods via CocoaPod, including Alamofire
- Strong ability to work in an agile environment (Scrum)

### **Required profile :**

- Understand best practice in relation to mobile environments
- Understand deployment management, managing certificates, profiles and submission of applications to the AppStore
- Compliance with iOS guidelines
- Production of good quality code and capability for code abstraction and code refactoring.

### **Personal skills :**

- Good oral and written communication
- Strong ability to adapt to a startup environment
- Independent and collaborative individual capable of working independently or as part of a team

### **Extras :**

- Have a live application on the store
- Participation in open-source projects
- Experience with RxSwift, Firebase and/or WatchOS
- Experience with connected objects (especially beacons)

### **Workplace:**

- Central London (EC3A), United Kingdom
- International travel may be required
